

Guadalupe Regional Medical Foundation is a 501(c)(3) organization that seeks to advance the mission of Guadalupe Regional Medical Center through the development of philanthropic resources and community awareness. This is accomplished through education, community relations, advocacy and fundraising. With the generous donations and support of many, the Foundation has donated over \$3 million dollars to fund key projects and programs that help shape the future of the innovative, life-saving and compassionate care that we are privileged to provide to our patients and community.

### CANCER ASSISTANCE FUND

The Cancer Assistance Fund provides for the needs of cancer patients that qualify for charity infusion chemotherapy at Guadalupe Regional Medical Center. We feel strongly that even those patients that are uninsured and unfunded should still have access to the curative cancer treatments that GRMC provides.

### CARDIAC CARE FUND

The Cardiac Care Fund provides for the growth and advancement of Cardiac Care Services at GRMC. This includes providing prevention and treatment of cardiovascular disease and stroke, ensuring life-saving technology and personalized rehabilitation to those in our community in need of care.

### PALLIATIVE CARE PROGRAM

Palliative care is specialized medical care for people with serious illnesses such as cancer, cardiac disease, COPD, kidney failure, Alzheimer's, Parkinson's and many more. It focuses on providing patients with relief from the symptoms, pain, and stress of a serious illness—whatever the diagnosis. The goal is to improve quality of life for both the patient and the family. Gifts to our Palliative Care Program ensure that these services are available to all in our community.

### HOSPICE PROGRAM

Our Hospice Fund defrays the cost of hospice care to patients and families not funded by Medicaid, Medicare or insurance. Hospice patients receive special end-of-life care in the comfort of familiar surroundings, at home or in their nursing home. Together, gifts, volunteers and a dedicated staff make hospice possible.

### PRESCRIPTION ASSISTANCE PROGRAM (PAP)

The PAP helps those with low or fixed incomes obtain free medications for chronic medical conditions, stabilizing the health and improving the lives of approximately 1,000 area residents in need each year. Since the creation of PAP, the program has helped almost 3,000 area residents receive medications worth more than \$31.2 million.

### GUADALUPE CLINIC

The newly established Guadalupe Clinic provides primary care for unfunded patients who suffer from chronic disease such as diabetes or hypertension. The clinic provides, one-on-one education, medication education and reconciliation and at-home disease management support to these patients.

### WOMEN'S HEALTH FUND

The Women's Health Fund provides for the growth and advancement of Women's Services at GRMC. These services include mammography and other diagnostic imaging, prenatal care including maternal fetal medicine, Birthing Center services and newborn care.

### THE T.J. COOPER ENDOWMENT FOR PASTORAL CARE

The Pastoral Care Department at GRMC believes that a person's spiritual well being can be an aid to the physical healing process. The Pastoral Care staff are committed, knowledgeable and experienced chaplains who offer compassion, support and respect for all faith traditions. This endowment will help ensure the future of Pastoral Care at GRMC.

### OTHER OPTIONS
